Songs4Peace

from South East Asia

Geejay Arriola is a peace worker, popular educator, theatre artist, music composer, cultural researcher, writer, publicist and web-designer. Geejay is currently media and communications director for Mindanao Commission on Women, an organization that works on poverty reduction, peace and multiculturalism and good governance.

Joji Benitez is a music composer and teacher, Culture and Peace Activist, Consultant in Strategic Planning and Project Management.

Monica Akihary is a singer-composer. She is the vocalist behind 'Uwai' (meaning images). Uwai is her third album. For her, each time she performs, it is as if she breathes new life into each of the songs. Her songs tell about the tenuous relationship of nature and man through the story of the beauty of trees and the need for man to cut them down to make furniture in order to sell them.
